Gentlemen:

Enclosed you will find a copy of the letter which we received after writing to the Tile Council of America, showing the manufacturers of quarry tile which first lists American Olean Tile Co. Also, we enclose a set of specifications from The Tile Council of America, Page 6, Paragraph 5.2.1.3.1 showing water absorption shall not exceed 5%. The spec number it must meet being TCA 137.1-1976 which is the same as Navy specification, I feel that since 90% of the quarry tile installed at Camp Lejeune and various other government bases and projects have been American Olean tile, this must be a misprint (2%).

Please advise us accordingly.

Sincerely,

cc: Dallas office  
Columbia office

Dear Mr. Jones:

Enclosed is a list of ceramic tile manufacturers. I have circled the manufacturers of quarry tile. Please write to any or all of them regarding tile with a water absorption of less than 2%.

Sincerely yours,

TILE COUNCIL OF AMERICA, INC.
